Session 1: Production
méthodes / methodology

1. Assimilation as a continuous coarticulatory process: first articulographic results.
   Bernd Pompino-Marschall

   John H. Esling, B. Craig Dickson, James R. Woolsey

3. Electropalatography of conversational speech
   Linda Shockey

4. Phonological disruption in word production
   Gregory V. Jones

5. Articulatory-acoustic correlations in the production of fricatives.
   Noël Nguyen Trong, P. Hoole, Alain Marchal

6. Initialisation, arrêt et variation de fréquence fondamentale de la vibration laryngée : étude électromyographique.
   Bernard Roubeau, Gabrielle Dassau, Jean Lacau, Claude Chevrie-Muller

   Christine Delattre, Pascal Perrier

8. An investigation of a special type of accentuation in Ripuarian dialects by computer simulation of speech production.
   Bernd-Joachim Kröger, G. Heike, C. Opgen-Rhein, Reinhold Greisbach, Otto Esser

9. Dynamique linguale des voyelles orales françaises - évaluation statistique à partir de données cinéradiographiques.
   Bernard Flament
Session 2 : Production
analyse et description / analysis and description

1 A feedforward control strategy can suffice for articulatory compensations.
   Shinji Maeda 3:38

2 Towards the spectral characteristics of fricative consonants.
   Christine H. Shadle, Pierre Badin, André Moulinier 3:42

3 Labialité vocalique : étude comparée des types, degrés et stratégies articulatoires de plusieurs langues.
   Jean-Pierre Zerling 3:46

   Najah Rhardisse, Rudolph Sock 3:50

5 The effect of vowel height on patterns of assimilation nasality in French and English
   Anne Rochet, Bernard Rochet 3:54

6 Fricative consonants and their articulatory trajectories
   Celia Scully, Esther Georges, Eric Castelli 3:58

7 Breathiness in male and female speakers
   Deborah Günzburger 3:62

8 Articulatory generalizations in acoustic phonetic research : a comparison of data from French and English.
   Sarah Dart 3:66

9 Effects of bite-block and loud speech on tongue height in the production of German vowels
   Ocke-Schwen Bohn, James Emil Fleger, Paul Dagenais, Samuel G. Fletcher 3:70

Session 3 : Perception

1 A model for the discrimination of pure tone pitch.
   Alain De Cheveigné 3:74

2 Perceptual sense units in the process of listening comprehension.
   Morio Kohno 3:78
3 Methods for reducing context effects in the subjective assessment of synthetic speech.
Caslav Pavlovic, Mario Rossi, Robert Espeiser 3:82

4 Order effect and the order of accents.
Liezelotte Schiefer, Anton Batliner 3:86

5 Categorical, prototypical and gradient theories of speech : reaction time data.
Douglas Whalen 3:90

6 Influence of negative intensity glides on the discrimination of speech segment duration.
Yukihiro Nishinuma, Serge Santi 3:94

7 Amplitude as a cue to word-initial consonant length :
Pattani Malay.
Arthur S. Abramson 3:98

8 Testing subphonemic perception processes in children suspect for an auditory disorder.
Paul Groenen, Ben Maassen, Thom Crul 3:102

9 The influence of speakers' own speech tempo on their tempo perception.
Mária Gósy 3:106

Session 4 : Phonétique diachronique / Diachronic phonetics

1 Accounting for the reflexes of labial-velar stops.
Bruce A. Connell 3:110

2 Laser-beam technology in diachronic phonetic research and ethnolinguistic field work.
Tjeerd De Graaf 3:114

3 Inter-speaker variability in sibilant production and sound change involving sibilants.
Alice Faber 3:118

4 Voice quality and moulding of phonologies : a substantial evidence.
Bharati Modi 3:122

5 Epenthetic nasals in the historical phonology of Hindi.
Manjari Ohala, John J. Ohala 3:126
6 Time-varying properties of contextually nasalized vowels: acoustics and perception.
Marie K. Huffman
7 Phonetic structure of word and peculiarities of its development (based on Germanic and Slavonic languages).
Valentin Taranets
8 Vowel harmony as a coarticulatory phenomenon in Nanay.
Galina Radchenko
9 Tendances universelles et stabilité des systèmes vocaliques.
Nathalie Vallée, L.J. Boë, J.L. Schwartz

Session 5: Phonétique descriptive / Descriptive phonetics

1 Marques segmentales sociosituationnelles en français contemporain.
Guéorgui Jetchev
2 Prosodic and paralinguistic features of onomatopoeia in Kayabi.
Helga-Elisabeth Weiss
3 The "older" voice.
Harry Hollien
4 On ingressive glottalic and velaric articulations in Xhosa.
Justus C. Roux
5 Physiological properties of "breathy" phonation in a Chinese dialect. A Fiberoptic and Electromyographic study on Suzhou dialect.
Ray Iwata, Hajime Hirose, Seiji Niimi, Satoshi Horiguchi
6 Intraseaker variation on the segmental level: a transcription-based approach.
Ton Broeders, Wilhem H. Vieregge
7 Phonétisation automatique: évaluation et enrichissement d’une grammaire de règles pour le français.
Rabia Belrhal, Laure Libert, Louis-Jean Boë
MAVL/VOT. De l'utilisation de la notion de moment d'apparition des vibrations laryngiennes pour la description phonétique.  
Jean-Pierre Goudaillier  

Three types of prosodic correlations in south German Dialects.  
Larissa Naidich  

Session 6 : Phonologie / Phonology  

1 Morphophonemics of weak-stem forms in modern Chaldean.  
Solomon Sara  

2 Stop assimilation in Quebec French ; an analysis by articulatory synthesis.  
Henrietta Cedergren, Danièle Archambault, Gilles Boulianne  

3 A study on distinctive features and feature hierarchies through "phoneme environment clustering" (PEC).  
Masatake Dantsuji, Shigeki Sagayama  

4 Le débit de parole : un filtre utilisé pour la génération des variantes de prononciation en français parisien.  
Anne Lacheret-Dujour  

5 La liaison à Orléans (France) et à Montréal (Québec).  
Daan De Jong  

6 Verb stress in Spanish.  
Santiajo Alcoba  

7 A study of vowel coarticulation in British English.  
James L. Hieronymus  

8 The "vowel-stickiness" phenomenon : three experimental sources of evidence.  
Bruce L. Derwing, Terrance M. Nearey  

9 Marginal vowels in Hungarian.  
Péter Siptár  

Session 7 : Prosodie / Prosody  

Accents et tons / Stress and tone
1 Local prominence of acoustic and psychophysical functions and perceived stress in French.
   Piet Mertens
   3:218

2 Word stress in Georgian.
   Priscilla-Clau McCoy
   3:222

3 Stress clash avoidance in Dutch: inversion of stress pattern in complex nouns?
   Vincent-Johan Van Heuven
   3:226

4 Intensity as a predictor of focal accent.
   Elmar Nöth, Anton Batliner, Thomas Kuhn, G. Stallwitz
   3:230

5 Analyse prosodique du coréen de Pusan.
   Boulie Jeong
   3:234

6 L'accent en indonésien et son interaction avec l'intonation de phrase.
   Myrna Laksman
   3:238

7 Tonal coarticulation patterns in quadrisyllabic words and phrases of Mandarin.
   Mao-can Lin, Jing-zhu Yan
   3:242

8 Relation between stress and vowel duration in syllable.
   Radka Kurova
   3:246

9 Two different intensity phenomena in the word prosody.
   Tatiana Nikolaeva
   3:250

Session 8: Intonation

1 The social distribution of intonation patterns in Belfast.
   Ellen Douglas-Cowie, Roddy Cowie, Joan Rahilly
   3:254

2 A preliminary description of pitch accents in Bahasa Indonesia.
   Ewald Ebing
   3:258

3 Modalité: variations sur un thème.
   Irina Fougeron
   3:262
4 Etude des relations entre geste et prosodie à travers leurs fonctions rythmique et symbolique. 
   Isabelle Guaitella 3:266

5 British English intonation and sentence structure. 
   Margreet Joyce Sanders 3:270

6 Role of Fo and pause in disambiguating syntactically ambiguous Japanese sentences. 
   Junichi Azuma, Yoshimasa Tsukuma 3:274

7 The intonational marking of focal structure : wishful thinking or hard fact ? 
   Anton Batliner, Wilhelm Oppenrieder, Elmar Nöth, Gabriele Stallwitz 3:278

8 Structure intonative de l'énoncé kazakh. 
   Zeihep Bazarbaeva 3:282

9 Les possibilitésdistinctives de l'intonation française en comparaison avec l'intonation russe. 
   Marina Rouber 3:286

Session 9 : Prosodie / Prosody
Rythme et organisation temporelle / Rhythm and timing

1 Is the P-center position influenced by "tone" ? 
   Peter Michael Janker, B. Pompino-Marschall 3:290

2 Rhythmic constraints in Japanese Phonology. 
   Haruo Kubozono 3:294

3 On a third type of speech rhythm : foot timing. 
   Kalevi Wiik 3:298

4 The effect of accentedness and information value on word durations : a production and a perception study. 
   Wieke Eefting, Sieb Nooteboom 3:302

5 Durational ratios of disyllabics in relation to the syllable boundary in Skolt Sami. 
   Zita McRobbie-Utasi 3:306

6 Cross-cultural perceptions of emotions through synthetic vowels. 
   Shiro Kori, Emanuela Magno Caldognetto 3:310
Stress-based vs. syllable-based languages: perception of timing differences in English and Croatian.
Visnja Josipovic, Ruth Huntley

Perception of the temporal structure in speech-like sound sequences.
Valentina Lublinskaya, Jaan Ross

Duration of English consonant clusters and sequences in the speech of native speakers and the Kazakh-English bilinguals.
Mukhamedjan Kireevich Isayev

Session 10: Pathologie / Pathology

Analysis of sound errors for the diagnostic differentiation of neurogenic speech disorders in children.
Geert Thoonen, Ben Maassen

Diadochokinetic tasks in speech assessment of spastic dysarthria and verbal dyspraxia in children.
Ben Maassen, Jan Wit, Geert Thoonen

L'émergence du babillage et son évolution chez l'enfant sourd.
Shirley Vinter

Phonetic factors in speech specific hearing aids.
Adrian Fourcin

A psycholinguistic assessment model for disordered phonology.
Vasanta Duggirala, Barbara Dodd

Prosody in revisions of adult and child fluent and stuttering speakers.
Peter Howell, Karima Kadi-Hanifi, Keith Young

Perceptual evaluations of spectral and temporal modifications of deaf speech.
Grace H. Yeni-Komshian, Timothy H. Bunnell

Phonological process analysis of three groups of preschool children: a longitudinal study
Jacqueline Bauman-Waengler, Hans-Heinrich Waengler
Acoustic and perceptual observations of speech after resection of malignant tumours in the oral cavity and oropharynx.
Ann-Marie Almé, Eva Oberg, Olle Engstrand

SESSIONS AFFICHEES / POSTER SESSIONS

Session 11 : Acoustique / Acoustics

1 Acoustic description of the Spanish approximants in Laboratory Speech and in continuous speech.
Lourdes Aguilar, Marcel Andreu

2 Modifications de la parole du plongeur à 60 mètres à l'air.
Marie-Hélène Casanova-Rossi, Alain Marchal

3 Phonation without text. From voice-whistle to speech.
Boris Chernov, Valentin Maslov

4 A study of coarticulation of unaspirated stops in CVCV contexts in Standard Chinese.
Zong-ji Wu, Guohua Sun

5 Non-linear method for investigation of a vocal source based on the speech signal.
Arkadi Nikolaevich Sobakin

6 Modalisation de questions totales et paramètres accentuels de morphèmes interrogatifs post-verbaux.
Nicole Maury

7 On articulatory description rules in speech signal analysis and recognition.
Ryszard Gubrynowicz

8 Wigner time-frequency representation for major places of articulation in stop consonants.
Grzegorz Dogil, Wolfgang Wokurek

9 Comparative methods for measurement of VOT.
W. S. Brown, Rudolf Weiss, Richard J. Morris

XIV
Session 12 : Perception

1 The functional model of auditory segmentation.
Elvira Stoliarova 3:398

2 Lexical access as continuous matching without discrete phonological units.
Kari Suomi 3:402

3 Modelling auditory organization and sound source separation.
Martin Cooke 3:406

4 The disposition of high frequency energy in the pitch period.
Mart Rohila 3:410

5 Frequency dependent amplitude characteristics of hearing.
Victor Shupljakov, Ludmila Lesogor 3:414

6 Perception of the loudness of short impulse acoustic signals.
Ludmilla Lesogor, Victor Shupljakov 3:418

7 Perceptual restoration of fricatives.
Bruno H. Repp 3:422

8 The P300 evoked Potential as a measure of neurologic reaction time for three levels of phonemic acoustic divergence.
Lawrence F. Molt, Richard S. Saul 3:426

9 Within category discrimination of stops : are the subjects using their own phonetic prototypes?
Jorge Gurlekian, Minoru Tsuzaki 3:430

10 Sentence context in the perception of filtered speech by native and non-native listeners.
Vesna Mildner 3:434

Tsuneo Yamada, M. Matsui, K. Miyamoto 3:438

12 The perception of Russian nominal word forms.
Marina Rusakova 3:442

XV
13 Transition rate as a cue in the perception of one-formant speech-like synthetic stimuli. 
Astrid Van Wieringen, Louis C.W. Pols 3:446

14 Auditory image movement in evoked potentials. 
Svetlana Vaitulevich 3:450

15 Auditory Analysis of complex sounds with different phase spectrum. Electrophysiological study. 
Elena Radionova 3:454

16 How the fundamental or formant frequency changings affect pitch perception of speech-like sounds? 
Elena Ogorodnikova 3:458

17 Comparison of psychophysical and modelled estimates of auditory representation of context-conditions fricatives. 
Margaret F. Cheesman, Stefan Krol, Donald G. Jamieson 3:462

18 The function of prosody in speech perception. 
Wilma A. Van Donselaar 3:466

Session 13 : Synthèse de la parole / Speech synthesis

1 Five years of coordinated research on text-to-speech conversion for Dutch : an overview. 
Sieb G. Nooteboom, Renée Van Bezooijen 3:470

2 Effets de règles micromélodiques sur la perception de logatomes synthétiques. 
Serge Santi 3:474

3 Morphological pre-processing in connectionist text-to-speech systems. 
William Ainsworth, Nicholas Warren 3:478

4 Speaking rate modelization in French. Application to speech synthesis. 
Katarina Bartkova 3:482

5 Effets de l'utilisation de la variété québécoise sur l'intelligibilité de la parole de synthèse. 
Jean Dolbec, Claude Paradis, Martin Brousseau, Denise Deshaies 3:486
6 Synthesis of German /r/ in text-to-speech.
Klaus Kohler 3:490

7 Significance of prosodic knowledge in a text-to-speech
system for Hindi.
A. S. Madhukumar, S. Rajendran, B. Yegnanarayana 3:494

8 Evaluation of allophone and diphone based text-to-
speech conversion at the paragraph level.
Renée Van Bezooijen, Louis Pols 3:498

9 Heuristics for handling Anaphora in the CSTR text-to-
speech system.
Alex Monaghan 3:502

Session 14 : Technologie / Technology
Synthèse et reconnaissance de la parole / Speech synthesis and recognition

1 Prosody Control for spontaneous speech synthesis.
Yoshinori Sagisaka, Nobuyoshi Kaiki 3:506

2 Estonian prosody model for speech synthesis.
Imre Siil 3:510

3 A tonal model for synthesizing polysyllabic words and
phrases in standard Chinese.
Shun-an Yang 3:514

4 DIRA : a speech understanding system.
Jean Caelen 3:518

5 Time domain analysis of speech sounds.
Asoke Kumar Datta 3:522

6 Phoneme recognition using multi-layer perceptrons.
Kjell Elenius, György Takacs 3:526

7 On the influence of some characters of Chinese tones
upon speaker recognition.
Guotiam Zhao, Han Xiandong 3:530

8 Phonotactically driven speech recognition.
Alessandro Falaschi 3:534

9 Knowledge of speaker characteristics : its benefits and
quantitative description.
John-Bruce Millar 3:538

XVII
